

NOMAN JAMAL

Data Analyst | MIS Executive

Shahjahanpur, Uttar Pradesh | +91-8317008616 | nomanjamal98@gmail.com | linkedin.com/in/nomanjamal

PROFESSIONAL SUMMARY

Data Analyst / MIS Executive skilled in Advanced Excel, Power BI, SQL, and Python. Turns raw data into clean dashboards, reports, and actionable insights that drive faster business decisions.

CORE TECHNICAL SKILLS

Advanced Excel: VLOOKUP, XLOOKUP, HLOOKUP, INDEX-MATCH, LAMBDA Function, Pivot Tables & Pivot Charts, Power Query, Power Pivot, Conditional Formatting, Data Validation, SUMIFS/COUNTIFS/AVERAGEIFS, What-If Analysis

Google Sheets: QUERY, ARRAYFORMULA, IMPORTRANGE, FILTER, VLOOKUP/XLOOKUP, Pivot Tables, Conditional Formatting, Google Apps Script (basic), Collaborative Reporting

Power BI: DAX, Data Modeling, Power Query, Custom Visuals, Interactive Dashboards (Intermediate)

SQL: SELECT, JOINs, Subqueries, Aggregate Functions, GROUP BY/HAVING, Data Querying & Filtering (Intermediate)

Python: Pandas, NumPy, Data Cleaning & Preprocessing, Basic Data Analysis Scripts (Basic Knowledge)

Statistics: Descriptive Statistics, Mean/Median/Mode, Standard Deviation & Variance, Correlation Analysis, Trend & Comparative Analysis

Reporting & MIS Tools: MS Word (Mail Merge, Formatting), MS PowerPoint (Slide Design), MIS Report Automation, Data Documentation

WORK EXPERIENCE

Associate Data Analyst | Uncodemy (Remote)

Dec 2025 - Present

- Analyze, clean, and visualize real-world datasets using Advanced Excel (Pivot Tables, INDEX-MATCH, Conditional Formatting) and Power BI to support data-driven decision-making.
- Build interactive dashboards and MIS reports, applying statistical measures (averages, trends, variance) to summarize key business metrics.
- Transform raw, unstructured data into clean, structured formats for analysis using Excel functions and Power Query.
- Apply LAMBDA and lookup functions (VLOOKUP/XLOOKUP/INDEX-MATCH) to automate repetitive reporting tasks and reduce manual effort.
- Perform data analysis using Excel and Python (Pandas) to generate actionable insights and support business decisions.
- Coordinate with cross-functional teams to gather requirements and deliver accurate, timely reports.

PROJECTS

Store Sales Data Analysis | Tools: Microsoft Excel (Pivot Tables, INDEX-MATCH, Conditional Formatting, Charts)

- Collected and cleaned sales data using Excel functions, lookup formulas, and conditional formatting to flag outliers.
- Performed data analysis using Pivot Tables and INDEX-MATCH to identify sales trends and patterns.
- Created interactive charts to visualize revenue, product performance, and monthly growth.
- Identified top-selling products and key business insights to support decision-making.

COVID-19 Two-Day Comparative Analysis Report | Tools: Microsoft Excel, Power BI, Statistical Analysis

- Developed a two-day COVID-19 comparison report using statistical measures (percentage change, trend comparison).
- Visualized patient counts using charts, cards, and metrics in Power BI.
- Performed trend analysis to identify increase or decrease in cases across regions.
- Delivered a clear, user-friendly dashboard for quick, data-driven insights.

EDUCATION

Bachelor of Computer Application (BCA)

MJPR University, Uttar Pradesh | Aug 2021 - Jun 2024

Intermediate

Uttar Pradesh Board

SOFT SKILLS

Time Management, Leadership, Problem Solving, Adaptability, Quick Learner, Team Coordination
